- Enzyme
- Embers
- d3
- Core Java, J2EE

Professional Experience

Procore Technologies: Jan 2019 - Current

Location: New York
Technology: Javascript, Angular, React, Redux   **Product**: Client facing portal

- Developer working on existing application built on AngularJS, to add more features.
- Worked on plugging the ability to sign envelopes online leveraging DocuSign API.
- Working on React application to add forecasting features to the client's budget.

JP Morgan & Chase: Nov 2017 – Jan 2019

Location: Jersey City, NJ
Technology: Javascript, Angular, CSS3, NVDA Screen reader.   **Product**: Client facing portal

- Working as front-end developer developing a document management portal for JPMorgan bankers to request to upload/sign documents from their clients.
- JPMorgan was mailing the documents till date to their clients which was costing them big, so they wanted a secure channel to communicate with clients.
- Developed an application in angular, with emphasis on making it feature rich and as productive as outlook.

Cognizant Technology Solutions: Jan 2017 - Nov 2017

Client: JPMorgan & Chase, Jersey City
Technology: Javascript, Embers, d3   **Product**: Client facing portal

- Working as front-end developer developing widgets for client facing portal of JPMC.
- Developed multiple widgets which show real time balance in accounts in graphical representation.
- Handled build and deployment process for release activities

---

Virtusa Corporation: Dec 2012 - Jan 2017

Client: Truven Health Analytics, Denver   **Platform**: Windows
Technology: AngularJS, HTML and CSS   **Duration**: July 2016 - Nov 2016

- Developed a portal which aims at displaying client data into appropriate tableau visualizations and bind it using angular, to enable internal users to see the data in more meaningful form and act accordingly. Client is a well reputed health care provider.

....

Client: John Wiley Publications, Hyderabad   **Platform**: Windows
Technology: ReactJS, BackboneJS, NodeJS, JavaScript   **Duration:** Apr 2015 - Feb 2016

- Develop a portal which aims at automating the process of enabling an author to create articles, view or edit them, sign agreements with the publishers and publish the content.

....

Client: A&E networks, Hyderabad   **Platform**: Windows
Technology: KnockoutJS, KendoUI, JavaScript   **Duration:** Aug 2014 - Apr 2015

- Existing portal was developed using MS Access, hence has limited capabilities (is not responsive). Hence this project is aimed at migrating this existing application into HTML5 using KnockoutJS to enable fast rendering and be mobile friendly.

Client: Fidelity Investments, Hyderabad   **Platform:** Windows
Technology: ReactJS, AngularJS, JavaScript   **Duration:** Jan 2014 - Aug 2014

- Designing a tool for architects of Fidelity to manage the products or projects assigned to them in real time. See the metrics of open issues, reviews status etc. in pictorial representation and compare it with others in organization.

Client: GE Transportation, Hyderabad   **Platform:** Windows
Technology: Spring portlets, Core Java, CSS   **Duration:** Feb 2013 - Apr 2014

- GE needs a portal application which supports registrations of customers and access to corresponding business type content. This content needs to be managed and approved based on the on the roles of users. Used Liferay to develop the portal. Used Spring portlets to develop individual portlets like login, notifications etc. Used features of Liferay like Roles and Users to cater the needs of this portal.

Education

B.E. (HONS.) IN COMPUTER SCIENCE, BIRLA INSTITUTE OF TECHNOLOGY AND SCIENCE
PILANI, HYDERABAD CAMPUS, TELANGANA, INDIA (2008 - 2012)
