Hello there,

I am Bhargav, I have been working as a front-end developer for quite some time now. My expertise include jQuery, Javascript, HTML alongside with ReactJS, Angular, Knockout, Ember. I have worked on different tech stack for multiple projects which made me comfortable ramping up or getting to pace with any new technology. Has experience using nodeJs as backend for projects and using gulp, grunt and web pack as build tools.

I have worked for A&E, John Wiley, Truven Health in past. I currently work for JPMorganChase as Front end developer.

I have been looking for a challenging position where i could stay upto date with technologies as well as hand s on experience using them in real time projects.
